

## ANT SPECIES OF THE McLAUGHLIN RESERVE

(adapted from the research of Brian Fisher)

Order and Species	Habitat Type
<b>Dolichoderinae</b>	
<i>Liometopum luctuosum</i>	S
<i>Liometopum occidentale</i>	N
<i>Tapinoma sessile</i>	N
<b>Ecitoninae</b>	
<i>Neivamyrmex nigrescens</i>	N
<b>Formicinae</b>	
<i>Brachymyrmex depilis</i>	S/N
<i>Camponotus vicinis</i>	S/N
<i>Camponotus essigi</i>	N
<i>Camponotus hyatti</i>	N
<i>Camponotus semitestaceus</i>	S/N
<i>Camponotus yogi</i>	S
<i>Formica lasioides</i>	N
<i>Formica moki</i>	S/N
<i>Formica cf. xerophila**</i>	S
<i>Prenolepis imparis</i>	S/N
<b>Myrmicinae</b>	
<i>Crematogaster coarctata</i>	S/N
<i>Leptothorax andrei</i>	S/N
<i>Leptothorax nevadensis</i>	S/N
<i>Leptothorax nitens</i>	S/N
<i>Messor andrei</i>	N
<i>Monomorium ergatogyna</i>	S/N
<i>Pheidole californica</i>	S/N
<i>Solenopsis molesta</i>	S/N
<i>Solenopsis xyloni</i>	S/N
<i>Stenamma diecki</i>	S/N
<i>Stenamma punctatoventre</i>	S/N
<b>Ponerinae</b>	
<i>Amblyopone pallipes</i>	S
<b>Pseudomyrmecinae</b>	
<i>Pseudomyrmex apache</i>	S

\*\*species restricted to serpentine throughout range

S = found on serpentine substrate

N = found on non-serpentine substrate
